HOW CAN THINKCOLOUR HELP
IT MANAGERS

Smarter technology for all

Lenovo

WHY INSTALL NOW?

• At least **40%** of employees will continue working remotely, making remote asset management a top priority for IT [1]

• **Remote working** has translated to escalated workloads for IT professionalls [2]

• Top IT requests include mundane tasks such as "my shortcuts are missing" or "on-screen text is too small" [3]

• REDUCE HELP DESK PILE-UPS: CISOs will continue to support virtual workarounds for help-desk staff who would work in the office under normal circumstances [4]

CUSTOMER PAIN POINTS:

• Inability to remotely manage monitor fleet

• Time wasted on manual monitoring and reporting

• Complicated process for batch adjustment

• Need to streamline work with auto installation and updates

• Need to quickly access remote assets to prevent data leaking

WHAT THEY NEED:

• Information obtaining and monitoring

• Asset report generating

• Adjust monitor settings or deploy new firmware as a batch

• Enable scheduled settings

• Remotely lock or disable monitors/ports

ThinkColour helps IT Managers turn insight into action without leaving their desks

• ThinkColour gives IT Managers the ability to **remotely monitor** model names, connected status and running times, instead of physically checking on assets or only managed PCs

• ThinkColour helps IT managers **push updates remotely** for basic settings, factory setting restore, batch deployments and firmware updates

ThinkColour is a smarter technology to help IT Managers get more out of their working day and reduce physical visits

• ThinkColour is pushed to users as an **easy, self-service update** to meet their demands

• ThinkColour gives you the ability to deploy updates by series

• ThinkColour allows users to **create scenarios** to **quickly switch between different settings**

ThinkColour goes beyond physical security by giving IT managers the ability to adjust assets remotely

• ThinkColour's remote management capabilities ensure that assets can be **accessed from anywhere**

• ThinkColour offers rapid solutions to security challenges through **lock monitor, anti-theft reminder, disable OSD and USB/Video ports**

ThinkColour

*ThinkColour is available on ThinkVision monitors with special features compatible for select models only.
*Remote asset management functions are supported by third party central management solutions such as Microsoft Endpoint Manager.
